- Select a Splice Kit to fit the installation planned
- Snap-on lids in Metal or Lexan® to protect the splices
- RoHS Compliant

Splice Kit FE-SK1

Splice Kit FE-SK2

Splice Kit FE-SK3

Description

L-Com's Splice Kits provide a number of combinations and options for the Single and Mass Splices in Fiber Cable and Distribution Management for the termination and distribution of Fiber for the professional. The Splice Kits give a number of options to the installer permitting positive fiber management, connectivity and distribution. These Splice Kits provide protection of critical splices and fit optimally in the Splice Trays. The Splice Trays are fabricated of aluminum offering protection from damage in Rack and Wall mounted enclosures. The Tray cable entry points are protected and the cover provides full and easy access.

Select the Splice Trays from the options available from L-Com. Select the required Splice Kit or Kits necessary to handle a number of splice connections. They fit firmly in the Splice Trays which are made to fit perfectly in the Wall and Rack Mount Fiber Enclosures after the critical splices have been completed.

L-Com's Fiber Enclosure Line offers exception integrated fiber management in a Wall or Rack Mount enclosure configuration. Whether you select the Wall or Rack enclosure empty or configured for your application, L-Com provides a durability enclosure with the convenience of one point Fiber splice, termination and distribution.
